DETAILED ACTION

Allowable Subject Matter

Claims 50-94 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art reference does not disclose or suggest the claimed invention.

Regarding claim 50, Eilers et al (US 5,286,455) discloses a shell-and-tube type reactor for carrying out catalytic gaseous phase reactions (see Abstract and figure 1), comprising (a) a bundle of contact tubes (9), through which the relevant reaction gas mixture flows, that extend between a gas intake-side tube sheet (13) and a gas output-side tube sheet (14), that contain a catalytic filling, and that are flushed by a heat transfer medium inside a surrounding reactor shell; (b) a gas intake hood (4) and a gas outlet hood (11) spanning the two tube sheets, respectively, for providing the relevant process gas to the contact tubes and for evacuating the reacted process gas from the contact tubes; and (c) a process gas main pipe (6) for feeding the process gas into the gas intake hood (see column 5, line 27-68).

Eilers et al does not disclose or suggest a shell-and-tube type reactor comprising (c) a process gas main pipe for feeding the process gas into the gas intake hood, the improvement wherein the process gas main pipe comprises a first section, in which the process gas is in a non-explosive range, and in process gas flow direction behind it a second section, in which the process gas is in an explosive range; wherein the process gas main pipe comprises in its first section a check valve arrangement; and wherein the

check valve arrangement and the gas intake-side tube sheet, and all parts therebetween, which bear the process gas pressure under normal operation conditions, are designed to withstand the maximum pressure caused by a deflagration or detonation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See DE 20301515 (U1) and Giehring (DE 1667247).
